Bruner Library

Jerome Bruner played an important role in the establishment of the MPI. Following his death in 2016, the Bruner family donated his scientific library (comprising about 3,200 books) to our Institute.

Specials with Bruner books

Jerome Bruner's books have dedications are other material attached to them, we also added comments in the metadata. At the moment only (or better) visible with our 'old' catalog

- footnotes: In the footnote field we list the presence of text, comments on the sideline or on post-its, dogears, underlines, ...
    - if the comments are throughout the book, the footnote says: 'with comments'
    - if the comments are only in one chapter the footnote says 'comments in chapter ..' or 'with comments on pages 3-12'

- special additional content: additional content we scan and attach the scan to the book description. The scans are called note.
    - dedications
    - correspondence
    - business cards
    - recommendation
    - other : (boarding cards, invoices, shopping lists, ...)

Bruner Booklet

https://www.mpi.nl/news/jerome-bruner-library-new-york-nijmegen

THE JEROME BRUNER LIBRARY

From New York

to Nijmegen

Max Planck Institute for Psycholinguistics

The booklet contains the edited versions of the lectures that were given during the opening of the library - by Pim Levelt (Director Emeritus), Karin Kastens (Head of Library) and Eleonor Fox (Professor at the New York University School of Law). Together they tell a story of the amazing and wonderful relocation of the Jerome Bruner Library and at the same time reveal the extraordinary life of a wonderful man and world-renowned scientist.
The booklet shows the richness of the handwritten dedications that characterise the books in the Jerome Bruner Library. Bruner's 'Gelehrtenbibliothek' houses a variety of world-famous authors, with many of whom Bruner was befriended.

To create this booklet, the Max Planck Institute collaborated with the Gerrit Rietveld Academy in Amsterdam, one of the world's most famous art academies. By combining the qualities of the Jerome Bruner Library, the Gerrit Rietveld Academy and our Institute, we hope we have created a memorable publication, with the aim of enticing people to visit the library.

LIBRARY

The MPI's library team supports all our researchers by providing printed and electronic content. We are committed to locating and sharing the right information quickly and efficiently, thereby contributing to the success of the Institute's research.

Accessing information

The library's collection closely reflects the research that is currently being carried out at the Institute. Max Planck-wide licenses, as well as dozens of locally licensed e-journal subscriptions relevant to our research areas, provide access to more than 17,000 academic e-journals. Thanks to our catalogue, our staff have access to more than 500,000 ebooks, as well as the publications and presentations stored in our publication repository. Relevant reference databases can also be accessed.

Remote access to licensed content via Ezproxy

Ezproxy provides remote access to our licensed resources like ejournals, ebooks, Web of Science etc. Please sign in with your MPI credentials https://login.ezproxy.mpi.nl

Publication Repository

In close cooperation with the research staff, we are responsible for managing and updating the Publications page on this website. These publications are taken from our repository, MPG PuRe. The

About Open Access

Publishing Open Access

More exposure for your work

Practitioners can apply your findings

Researchers in developing countries can see your work

Higher citation rates

Taxpayers get value for money

Compliant with grant rules

The public can access your findings

Your research can Influence policy

Open Access
- Makes your work more visible
- Compliant with grant funders
- Potentially higher citation rates

MAX PLANCK

Open Access journal articles at MPI Nijmegen 2016-2022
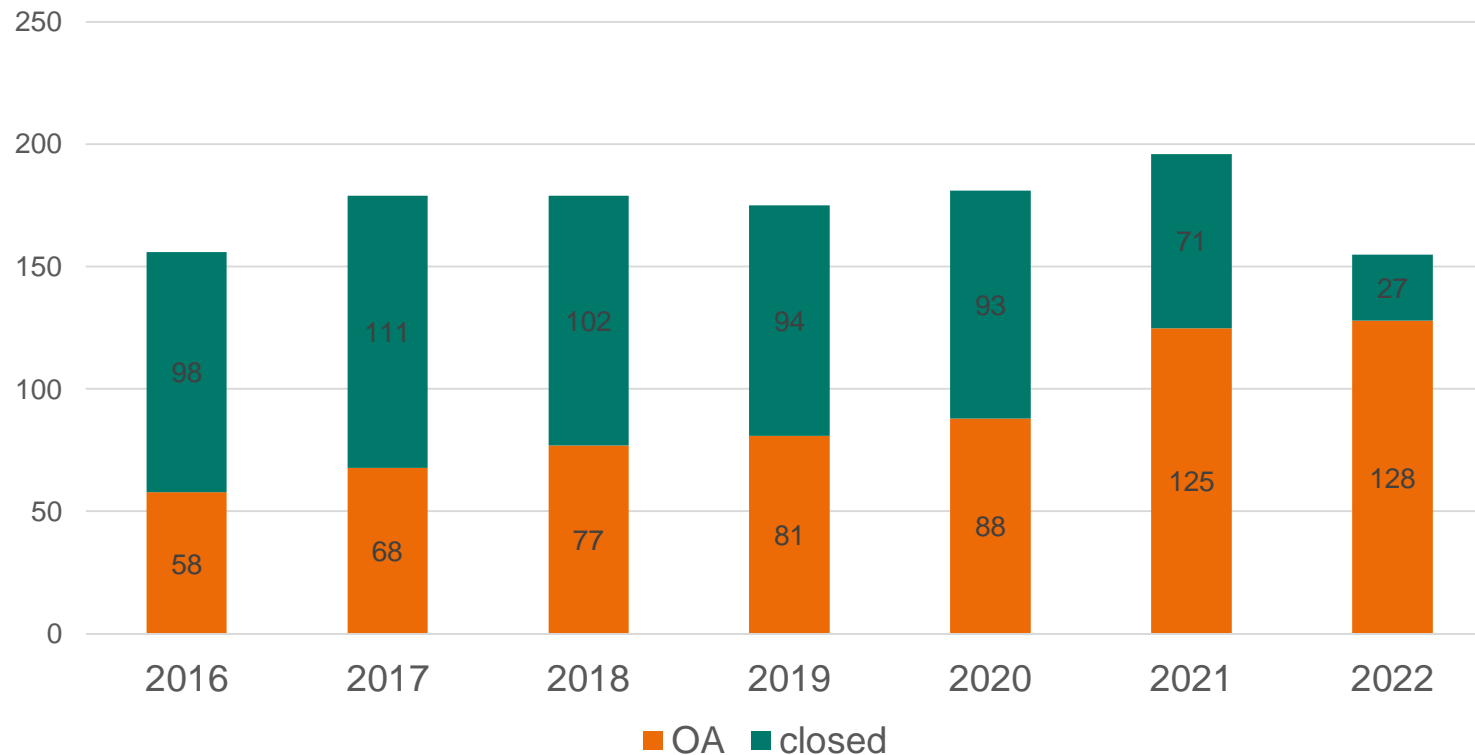

2016:
37% of journal articles were open access

2022:
83% of journal articles were open access

Using central funding really helps support Open Access!!

Open Access Fees
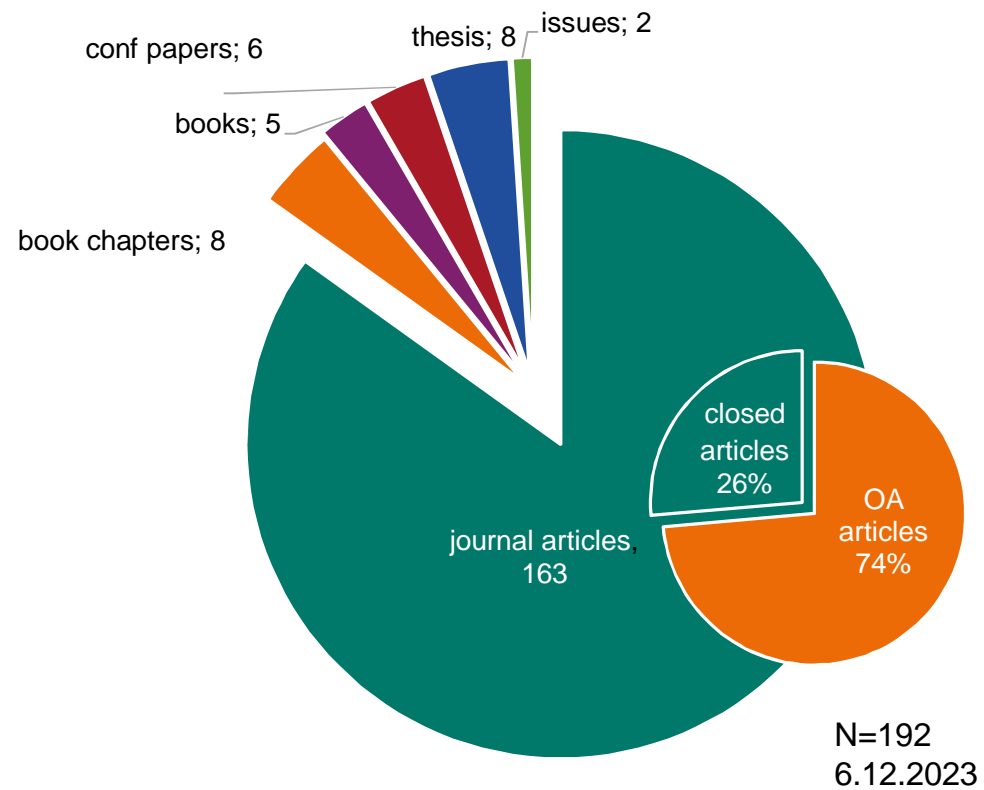

http://maxintra/library/open-access/open-access-fees

Max Planck Digital Library (support unit in Munich) negotiates contracts for Open Access Charges to be paid centrally. An agreement is a prerequisite that MPDL will pay the fees. The current MPS wide contracts are with these publishers:

https://oapublishing.mpdl.mpg.de/journals/

Workflow OA - I want to publish Open Access

Before submitting to a journal:
- Check your funders requirements (if applicable)
- think about uploading your manuscript to a preprint server

CHECK: does the journal has (Gold or Hybrid) Open Access options?

YES
- **Check** if MPG offers APC funding -> https://oapublishing.mpdl.mpg.de/journals/
  Radboud: https://www.openaccess.nl/)
- If yes: submit and follow instructions after acceptance!

- If not no central OA funding:
  - check if your OA APC will be funded with your MPI department
  - If not:
    - take the green road and use MPG.PuRe or Radboud Repository (check the requirements of journals via Sherpa/Romeo)
    - also check needs for funder requirements

NO

take the Green Road and deposit your work in repository (MPG.PuRe or Radboud Repository
- check journal requirement with Sherpa/Romeo

MAX-PLANCK-GESELLSCHAFT | GEORG BOTZ   TOWARDS A MAX PLANCK OPEN SCIENCE STRATEGY   1
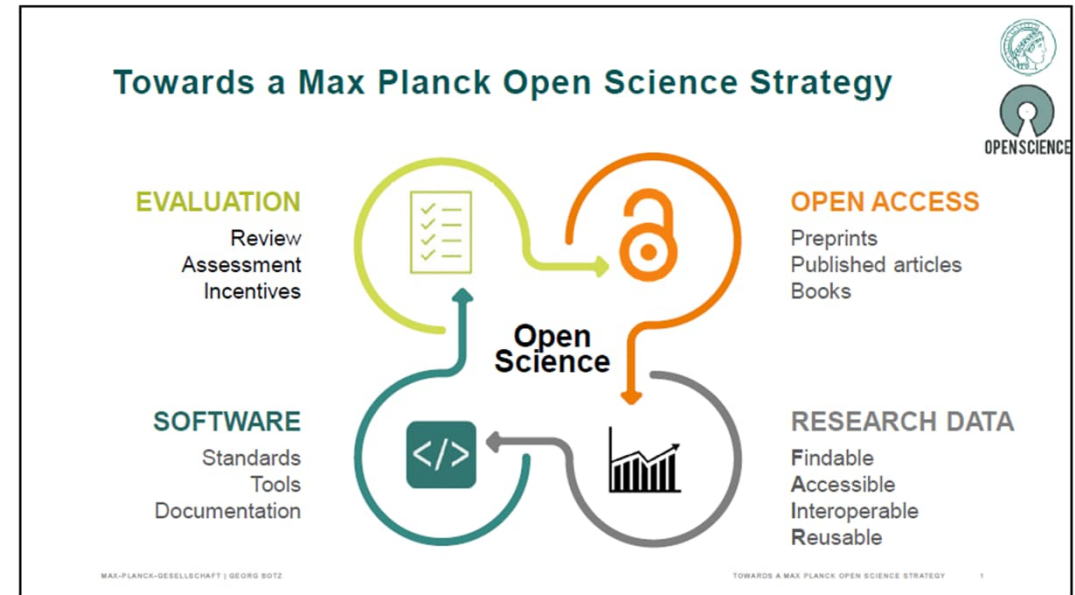

Open Science is high on the agenda of research politics

• UNESCO, European Commission (Horizon Europe, and ERC) • USA: Year of Open Science • European Open Science Cloud (EOSC) • National Research Data Infrastructure (NFDI) • Future Research Data Act (Germany)

Max Planck Position re Open Science (G6 statement on Open Science):

• Future research assessment should incentivize the provision of Open Access, FAIR data, software, tools, and active contributions to Open Science, and in this way enable the appreciation of the work involved.
• Researchers and support staff must gain the knowledge and skills required to embrace new open science practices, and new roles must be introduced in the RPOs staff.

↗ DOI   ⬇ Full Text

Abstract

nfants start learning words, the building blocks of language, at least by 6 months. To do so, they must be able to extract the phonological form of words from running speech. A rich literature has investigated this process, termed word segmentation. We addressed the fundamental question of how infants of different ages segment words from their native language using a meta-analytic approach. Based on previous popular theoretical and experimental work, we expected infants to display familiarity preferences early on, with a switch to novelty preferences as infants become more proficient at processing and segmenting native speech. We also considered the possibility that this switch may occur at different points in time as a function of infants' native language and took into account the impact of various task- and stimulus-related factors that might affect difficulty. The combined results from 168 experiments reporting on data gathered from 3774 infants revealed a persistent familiarity preference across all ages. There was no significant effect of additional factors, including native language and experiment design. Further analyses revealed no sign of selective data collection or reporting. We conclude that models of infant information processing that are frequently cited in this domain may not, in fact, apply in the case of segmenting words from native speech.

MPI Website and publication lists

Exchange between [MPG.PuRe](#) (our repository) and our website in order to dynamically render publication lists

Publications, presentations (posters, talks) entered into MPG.PuRe are used for:

- internal lists (staff meeting lists, Fachbeirat, etc.)
- and for rendering publications on our website

Info at MaxIntra

- http://maxintra.mpi.nl/library/publication-managment/pubman/pubman

Entering publications/presentations into MPG.PuRe

- Done by yourself -> username: (mostly) your surname
  - initial password: *Friday13!*
- or by (additionally) library staff

Please choose the appropriate collection

- enter (your) publications without an MPI affiliations in Non MPI publications context

- enter (your) publications with an MPI affiliation (by any of the authors, not necessarily yours) in the Publications of the MPI for Psycholinguistics context

→ There is no difference displayed on your publication list on your website

https://pure.mpg.de/

username: surname
passwd: Friday13!

- Select either
    - full manual submission or
    - Import from WoS, BibTex, Endnote
    - fetch via CrossRef with DOI

- Then choose the right collection (see previous slide)

Input Genres

The input fields are genre dependent

Note for the website:

- Journal Article, Book, Book Chapter, Proceedings, Conference Paper, Thesis -> go to your *Publication Tab*

- Talk, Poster → go to your *Presentation Tab*

- Preprint goes to a *Preprint Tab*

- Other genres are not yet established on our website

Recent publications on display

Recent publications are displayed on 3 publication stands throughout the building: Common Ground, First floor Landing, and Second floor landing.

On display:
- Three most recent NewsItems based on publications together with their respective papers.
- Two publications of each department/research group from our quarterly the Staff Meeting publication list. After each staff meeting a new selection is being made.

Visit https://www.mpi.nl/page/recent-publication-display
Scan the **QRcode** (on the stand) to get the list of publications on your mobile device.
